

THE CRECHE/NURSERY

WORKING WITH UNDER 2s

WHAT TO EXPECT

These little ones like to do the same activities repeatedly; it's how they learn. They also like to do things themselves. You will need to get down on the floor to play with them. They like you to be at their eye-level. Pay attention to what they are doing and encourage them. Show them simple puzzles and stories. Name objects and talk to them about what you see and do, so they can learn. Remember, they have a short attention span of one to two minutes.

They enjoy hearing poems and songs and doing actions to them. Their favourite words are 'me' and 'mine'. They like to play near other toddlers, but not necessarily 'with' them. This is called 'parallel' play. This age group will probably want to drink from a cup without assistance. They want to do things for themselves. Stacking and unstacking blocks is an enjoyable, and repeated, activity. They are learning to do things with their hands— turning knobs, pushing buttons and turning pages of board books.

When you don't understand them, they can become frustrated. They are only *learning* to share and cooperate. Sometimes their moods are based on their physical needs— hunger, tiredness and they can change quickly from laughter to tears.

They will feel neglected when you give more time to others than to them. They like to know when they have done something well.. Smile at them and encourage them.

Kids spell love 't-i-m-e'.
